

An Internship Report
Of
WEB DEVELOPMENT INTERNSHIP

Submitted
To
School of Computer Science and Engineering
IILM University, Greater Noida, U.P.

In partial fulfilment of the requirement of degree of
B.Tech (Computer Science and Engineering)

By
Roll Number of Student: _____

Name of Student: SARTHAK SINGH

Batch: 2024-2028

2026-27

CANDIDATE'S DECLARATION

I, SARTHAK SINGH, do hereby declare that the internship report titled “Web Development Internship at SnowXAI Technologies Private Limited” has been completed by me to fulfil the requirement for the award of the degree of Bachelor of Technology in Computer Science and Engineering.

I affirm that this report presents my internship experience and learning in an honest and accurate manner. The report has been prepared from my internship experience and the completion certificate issued by SnowXAI Technologies Private Limited.

I further declare that this report is my own academic work and has not been submitted to any other institute for any degree/diploma requirement. I shall be responsible for any copyright violation arising from material submitted by me.

Signature:-

Student Name: SARTHAK SINGH

Roll No.: _____

ACKNOWLEDGEMENT

I am using this opportunity to express my gratitude to everyone who supported me throughout my internship. I am thankful for the guidance, constructive feedback and professional exposure provided during my work as a Web Development Intern.

I would like to express my sincere gratitude to SnowXAI Technologies Private Limited for providing me the opportunity to undertake an internship in the field of Web Development. I am especially thankful to Mr. Mohd Zaid, Director, for the professional guidance and support associated with the internship.

I am also thankful to the School of Computer Science and Engineering, IILM University, Greater Noida, and the faculty members for their continuous academic support and encouragement.

I express my gratitude to my parents for their blessings and constant support.

Signature:-

Student Name: SARTHAK SINGH

Roll No.: _____

4.8 Methodology.....	6
4.9 Expected Outcomes.....	7
4.10 Certificate and Supporting Proof.....	8
5. Bibliography/References.....	9

3. INTERNSHIP COMPLETION CERTIFICATE

The Internship Completion Certificate issued by SnowXAI Technologies Private Limited confirms that Sarthak Singh successfully completed an internship as a Web Development Intern during the period 01 June 2026 to 31 August 2026.

SNOWXAI TECHNOLOGIES
PRIVATE LIMITED

Certificate No.: SXAI/INT-CERT/2026/002

Date of Issue: 10 September 2026

CERTIFICATE OF COMPLETION

This is to certify that
Sarthak Singh
has successfully completed an internship with
SNOWXAI TECHNOLOGIES PRIVATE LIMITED
(formerly operating as a pre-incorporation initiative of the founding team)
in the capacity of **Web Development Intern** during the period **1-Jun-2026 — 31-Aug-2026**

This internship was undertaken during the pre-incorporation period of the business that subsequently became SnowXAI Technologies Private Limited, and is hereby formally acknowledged and recorded by the Company following its incorporation.

During the internship, Sarthak Singh participated in assigned activities and contributed to projects related to **Web Development**.

The internship provided practical exposure to professional workflows, project collaboration, and relevant technical practices.

We appreciate the contribution and efforts made during the internship and wish the intern success in future academic and professional endeavors.

**Note:**
This certificate is issued by SnowXAI Technologies Private Limited to formally acknowledge an internship undertaken during the pre-incorporation period of the business that later became SnowXAI Technologies Private Limited.

Mohd Zaid
Director
SnowXAI Technologies Private Limited
Date: 10 September 2026

 New Delhi, India

4. PROJECT DESCRIPTION

4.1 Introduction

This report presents a detailed account of the Web Development Internship undertaken at SnowXAI Technologies Private Limited during the period from 01 June 2026 to 31 August 2026. According to the completion certificate, Sarthak Singh completed the internship in the capacity of Web Development Intern.

The internship provided practical exposure to professional workflows, project collaboration and relevant technical practices. During the internship, assigned activities and contributions were related to Web Development. The experience was intended to connect academic learning with practical development practices and professional project environments.

The certificate further states that the internship was undertaken during the pre-incorporation period of the business that subsequently became SnowXAI Technologies Private Limited and that the internship was formally acknowledged and recorded by the company following its incorporation.

4.2 Organization Profile

SnowXAI Technologies Private Limited is the organization named on the internship completion certificate. The certificate describes the internship as having been undertaken during the pre-incorporation period of the business that subsequently became SnowXAI Technologies Private Limited. Following incorporation, the company formally acknowledged and recorded the internship.

The certificate identifies New Delhi, India as the location and Mr. Mohd Zaid as Director. The internship role was Web Development Intern.

4.3 Problem Statement

Academic learning provides students with fundamental programming and computer science concepts, but practical exposure is important for understanding how these concepts are applied within real development workflows. A key objective of the internship was therefore to gain practical exposure to Web Development through assigned activities and project-related work.

The internship addressed the learning gap between theoretical knowledge and professional development practice by providing exposure to project collaboration, professional workflows and relevant technical practices. The certificate specifically records participation in assigned activities and contributions to projects related to Web Development.

4.4 Project Objectives

- To gain practical exposure to Web Development in a professional environment.
- To understand how web development activities are organized within project workflows.
- To apply programming and web development knowledge to assigned activities.
- To improve problem-solving and debugging skills through practical work.
- To understand the importance of project collaboration and communication.
- To develop familiarity with professional technical practices.
- To improve confidence in working on web development-related tasks.
- To connect academic knowledge with practical software development requirements.

4.5 Scope of the Project

The scope of the internship covered Web Development-related assigned activities and project contributions. The experience included practical exposure to professional workflows, project collaboration and relevant technical practices.

The internship scope can be understood through the following areas:

- Web development activities assigned during the internship.
- Participation in project-related tasks and contributions.
- Understanding the workflow used to organize and complete technical activities.
- Application of programming and development concepts to practical tasks.
- Collaboration and communication within a project environment.
- Testing, debugging and improvement of development work where required.
- Development of professional discipline, documentation and task-management habits.

The certificate does not specify a detailed technology stack, individual project names or a day-wise task list. Accordingly, this report does not claim specific frameworks, libraries or project deliverables that are not supported by the available certificate.

4.6 Technologies and Tools Used

The internship was carried out in the domain of Web Development. The completion certificate does not list the exact programming languages, frameworks, libraries or development tools used. Therefore, this section records the technology area without assigning unsupported specific tools.

Category	Role in Internship
Web Development	Primary technical domain of the internship and assigned project activities.
Programming / Scripting	Used as required to implement and modify web-development tasks.
Development Environment	Used for preparing, editing, testing and debugging development work.
Project Collaboration	Relevant to coordinating work and maintaining project progress.
Web Browser / Testing	Relevant to viewing and checking web-development output.

The purpose of this section is to accurately represent the technical domain stated on the certificate while avoiding unsupported claims about a particular technology stack.

4.7 System Architecture

Because the available internship certificate does not identify a single named software project or provide a technical architecture, a project-specific architecture cannot be stated as fact. The general web-development workflow followed during the internship can instead be represented at a conceptual level:

- Requirement / Task Layer – assigned web development activities and project requirements.
- Development Layer – implementation and modification of web-related functionality.
- Testing Layer – checking the developed work and identifying issues.
- Collaboration Layer – coordination and communication related to project activities.
- Output Layer – completed or improved web-development work submitted as part of assigned activities.

4.7 System Architecture (Conceptual Workflow)

The conceptual workflow below describes how a typical assigned web-development task can move through the internship learning process. It is presented as a learning/workflow model rather than as the architecture of a specific product, since no specific project architecture is provided on the certificate.

Stage	Description
1. Task Understanding	Understand the assigned requirement and expected outcome.
2. Planning	Break the requirement into manageable development activities.
3. Development	Implement or modify the required web-development functionality.
4. Testing	Check functionality and identify errors or inconsistencies.
5. Debugging / Refinement	Correct issues and improve the implementation.
6. Review / Collaboration	Discuss progress and incorporate relevant feedback.
7. Completion	Prepare the work for submission or project integration.

This workflow supported the practical-learning objective of the internship by connecting technical implementation with project collaboration and professional working practices.

4.8 Methodology

The internship followed a practical, activity-oriented methodology. Assigned work was approached by first understanding the task, planning an implementation, carrying out the development activity, testing the result and refining the work based on observations or feedback.

Phase	Activity	Purpose
1	Task Understanding	Understand requirements and expected results.
2	Planning	Identify the steps needed to complete the assigned activity.
3	Implementation	Work on the assigned Web Development task.
4	Testing	Verify the implemented functionality.
5	Debugging	Identify and resolve issues.
6	Collaboration	Communicate progress and coordinate work.
7	Review	Evaluate and improve completed work.

The methodology emphasized practical exposure rather than only theoretical study. The completion certificate specifically notes professional workflows, project collaboration and relevant technical practices.

4.9 Expected Outcomes

- Practical understanding of Web Development activities.
- Improved ability to work on assigned technical tasks.
- Better understanding of professional software-development workflows.
- Improved problem-solving, debugging and implementation skills.
- Greater awareness of project collaboration and communication.
- Improved ability to connect academic concepts with practical development work.
- Greater confidence in pursuing further work and learning in Web Development.

The internship completion certificate states that the internship provided practical exposure to professional workflows, project collaboration and relevant technical practices, and acknowledges the contribution and efforts made during the internship.

4.10 Certificate and Supporting Proof

The primary supporting document available for this report is the Internship Certificate issued by SnowXAI Technologies Private Limited. The certificate records Certificate No. SXAI/INT-CERT/2026/002 and the date of issue as 10 September 2026. It records successful completion of the internship in the capacity of Web Development Intern for the period 01 June 2026 to 31 August 2026.

The certificate also identifies New Delhi, India as the location and Mr. Mohd Zaid as Director. The certificate is attached in Chapter 3 of this report.

INTERNSHIP EXPERIENCE AND LEARNING SUMMARY

The internship provided an opportunity to experience the transition from academic learning to practical Web Development activities. The major learning value came from working within an assigned-task environment and understanding how technical work is connected with professional workflows and collaboration.

Technical Learning

- Understanding practical Web Development activities and requirements.
- Applying programming concepts to assigned development tasks.
- Learning to test and debug work systematically.
- Understanding the importance of functional and maintainable development work.

Professional Learning

- Understanding task ownership and responsibility.
- Communicating progress and issues during project work.
- Working collaboratively on project-related activities.
- Managing time and completing assigned activities.
- Accepting feedback and improving the quality of work.

Overall, the internship strengthened both technical and professional skills and provided practical exposure to the working environment associated with Web Development.

CONCLUSION

The Web Development Internship at SnowXAI Technologies Private Limited was a valuable practical learning experience. During the internship period from 01 June 2026 to 31 August 2026, I worked in the capacity of Web Development Intern and gained exposure to assigned Web Development activities, professional workflows, project collaboration and relevant technical practices.

The internship helped me understand how technical knowledge can be applied in a project-oriented environment. It also improved my problem-solving approach, professional communication, collaboration and confidence in working on web development-related tasks.

The experience has provided a useful foundation for further development of my technical skills and for pursuing future opportunities in Web Development and software engineering.
